BRING HUNTED-OUT SITES BACK TO LIFE

Fully submersible to 10 feet, the AT Pro International has been a real game changer for shallow water hunting. Its impressive recovery speed, target separation, and detection depth have also made the AT Pro International a legend for jewellery, coins, and relic hunting.

WHICH GARRETT ALL-TERRAIN DETECTOR IS BEST FOR YOU?

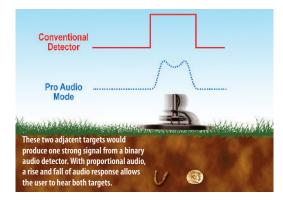

AT Max International — Offers the deepest detection, True All Metal Mode, and wireless capability. Recommended for all terrains, including both salt and freshwater environments. Use for coins, jewellery, relics, gold, and competition hunts.

AT Pro International — Choose from easy-to-learn Standard Modes or advanced Pro Modes for more target information and depth. Can be submerged in either saltwater or freshwater. Great for coins, jewellery, relics, and gold.

UNDERSTANDING THE PROPORTIONAL AUDIO FEATURE

The AT Max International and AT Pro International each feature advanced. proportional (Pro) audio modes. This allows the user to: hear subtle changes in a target's response; better judge a target's size, shape and depth; and enjoy a much faster recovery time when detecting adjacent targets.

The AT Pro International also includes three Standard audio modes, which provide a full-strength beep regardless of a target's amplitude. Many detectorists prefer this simpler, binary (either on or off) target response.

ALL-TERRAIN ACCESSORIES

Consider adding an optional searchcoil to enhance your detecting experience
