## UNDERSTANDING THE PROPORTIONAL AUDIO FEATURE

The *AT Max International*, *AT Gold*, and *AT Pro International* each feature advanced, proportional (Pro) audio modes. This allows the user to: hear subtle changes in a target's response; better judge a target's size, shape and depth; and enjoy a much faster recovery time when detecting adjacent targets.

The *AT Pro International* also includes three Standard audio modes, which provide a full-strength beep regardless of a target's amplitude. Many detectorists prefer this simpler, binary (either on or off) target response.
