GARRETT

Uncover the Unseen

PARAGON™

PARAGON™

Walk-Through Metal Detector

More than the sum of its parts.

The Garrett Paragon is a culmination of the best attributes of its predecessors, but also introduces never-before seen setup and operation features, as well as a distinct and pleasing new aesthetic. Modern security systems need a metal detector that is connectable, adaptable, and reliable. Paragon is all of that and more.

A model of excellence.

Paragon sets the bar for the future of security metal detection with its user-empowering features and high-performance detection capabilities. Catch the ferrous and non-ferrous metallic contraband you want to find with more program options than ever and improved sensitivity.

Diverse applications.

From stadiums to courthouses and theme parks to office buildings, Paragon has the flexibility to serve the needs of your moment. Respond in real-time with easily adjustable settings and superior mobility, ensuring that surprise traffic changes or unexpected VIPs never leave your security system scrambling.

IP 65

66 ZONES

BLUETOOTH®

AUTOMATIC UPS

NFC CHIP CARD
CAPABILITY

CELLPHONE
DISCRIMINATION

ADA Compliant
walkthrough available

NFC chip card capability.

Card reader allows settings adjustment without mechanical insertion, meaning less wear and fewer card replacements.

Integrated UPS.

Internally-mounted emergency power ensures continuous operation in the event of accidental AC disconnect or system outage.

Bluetooth®.

Bluetooth connectivity allows silent operation in noisy or formal security environments, as well as wireless communication to other devices.

Cellphone discrimination.

Optional settings allow cell phones to be ignored while still catching mass casualty weapons.

66 zones.

Granular awareness of alarm area top-to-bottom and left/middle/right is unmatched in the world of security metal detection.

Cabinet storage.

Allows charging of handheld detector while not in use.

Sophisticated design.

Paragon's smooth and trim structure is as at-home in an office building as a stadium.

Dual-sided detection.

Bilateral detection provides evenly distributed detection and simplifies multi-unit setup.

IP 65.

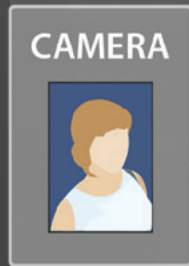

Exacting construction ensures all-weather performance and dust/water resistance.

Explore Integration with Garrett.

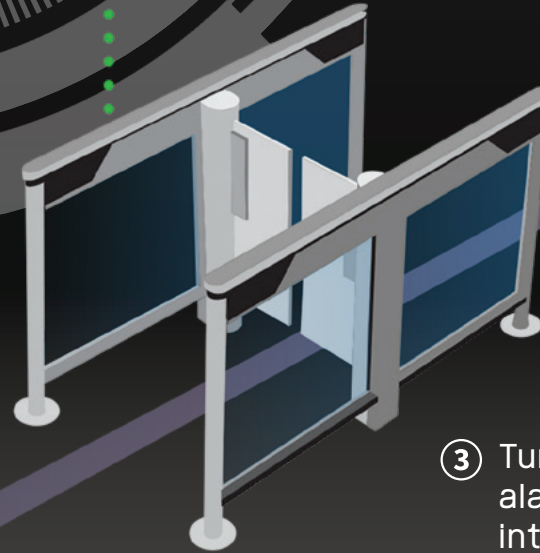

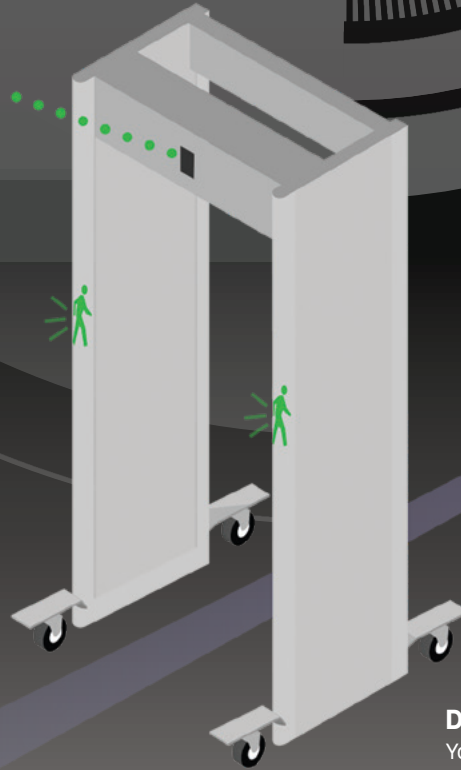

① Monitor your checkpoint with integrated video.

② Screen your patrons for metallic contraband.

③ Turnstile allows alarm-free patrons into secured area.

DID YOU KNOW?

You can now integrate your Garrett products with a wide variety of security technologies via System Integration and Product Integration. From cameras and door locks to turnstiles and x-ray machines, Garrett's detection technologies can work with your system to take your access control operations to the next level.

See page 7 for information about our integration accessories: *the IC Module and Relay Module.*

PD 6500i™

Walk-Through Metal Detector

★ Multi-brand compatibility

Add to existing checkpoints without replacing other brand units.

Optimum performance

20-plus programs to address the needs of mass transit, courthouses, prisons, schools, events, loss prevention, and more.

Dual-sided detection and accurate pinpointing

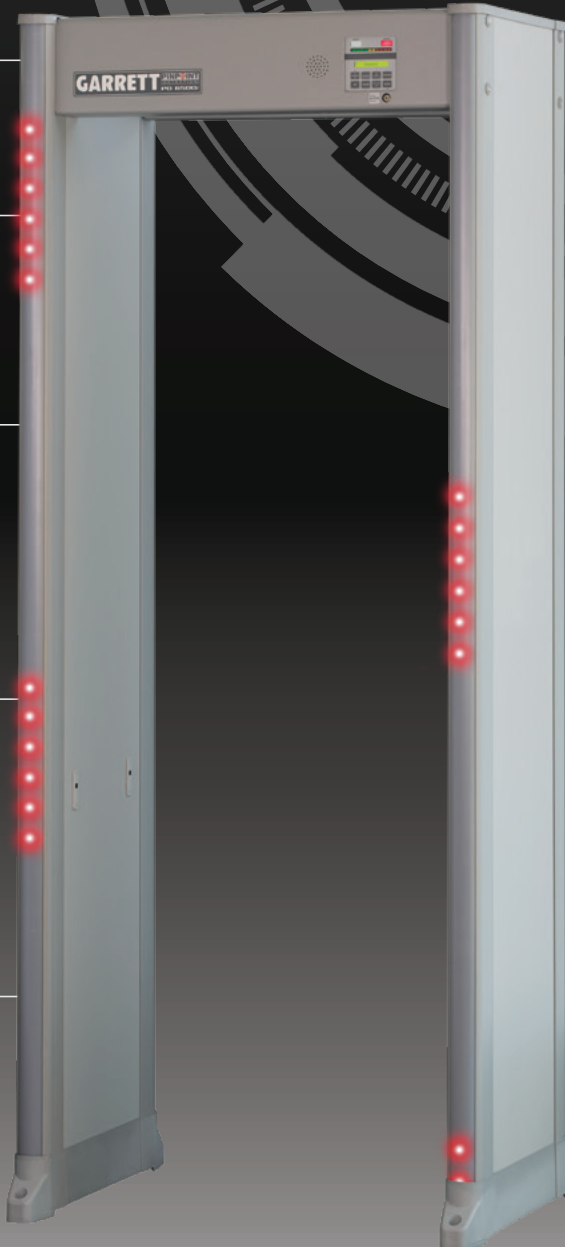

Provides uniform detection throughout archway and superior noise cancellation for easier setup. Provides precise pinpointing of targets in 33 zones (left, right, and center).

Advanced networking (optional)

Manage individual or groups of walkthroughs and perform statistical analysis of throughput using optional IC module. Remotely access controls, visual alarms and statistics.

Directional counter

Four settings for counting patrons: forward only, reverse only, subtract in reverse, and bidirectional.

Integrated & Complete Kits

Sometimes choosing the right accessories can be difficult. Garrett's variant checkpoint solutions provide primary and secondary screening, battery backup, mobility, and more.

For those who want to be sure that they've covered all their bases, Garrett's kits provide either integration-oriented or general-purpose security screening options. Talk to a member of the Garrett team to learn which kit is right for you.

**Kits also available for the Multi Zone walkthrough metal detector.*

Multi Zone™

Walk-Through Metal Detector

★ Enhanced 20-zone pinpointing

The *Multi Zone*'s twenty vertical zones provide precise location of one or more objects simultaneously.

★ Advanced features and simple controls

Menu slider bar allows quick adjustment of setting values. Auto-Setup function scans electromagnetic environment to select optimal frequency.

Advanced synchronization

Internal circuitry allows multiple detectors to operate as close as 2 inches from each other.

One hour battery backup

Includes 1-hour emergency back-up battery module in the event of power outage or AC power disconnect. 10-hour operation battery also available.

Bright LED indicators

Eye-level green "proceed/ready" symbol, red "wait/alarm" symbol, and zone indicators are highly visible in the brightest sunlight.

ACCESSORIES

Walk-Through Metal Detectors

Networking and monitoring. Mobility and stability. Garrett's security walkthroughs are supported by a host of accessory products designed to give the operator full flexibility.

RELAY MODULE

(Paragon, PD 6500i, or Multi Zone use)

Provides an isolated relay contact to control lights, doors, equipment. Internal dip switches provide 4 operating modes

- Activate on alarm
- Activate on passage of each patron
- Activate on alarm, release on non-alarm
- Activate on non-alarm for 5 seconds
- Used for System Integration.

iC Module

(Paragon, PD 6500i, or Multi Zone use)

Communicate to a walk-through metal detector with a laptop or PC through the network either wired or wirelessly. Allows control, real time monitoring, and diagnostics from a remote location.

- Used for Product Integration.

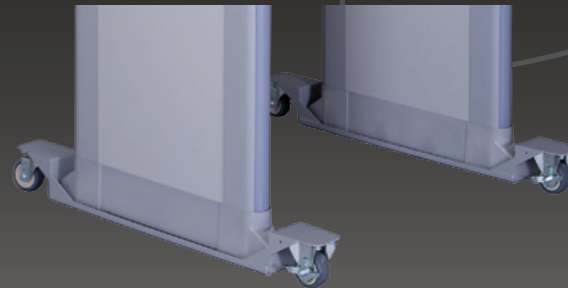

Quick-Q™

QUICK-Q CONTACTLESS SCREENING (PD 6500i or Multi Zone use)

Advanced Security Scanning Technology

Quick-Q technology provides quicker venue access by allowing patrons to pass through the checkpoint with cell phones and other small metallic items.
(For use with Garrett PD 6500i only.)

Walk-Through Caster Set

For use with Garrett PD 6500i and Multi Zone walk-through metal detectors.

Includes two rigid locking casters and two swivel locking casters. Ideal for schools, special events, and stadium use.

Battery Modules

Use for backup power or for multi-hour cordless operation for special events. Mounts internally. No external wires or modules.

Hand-Held Metal Detectors

Use either as a primary scanning tool or in secondary screening to pinpoint targets detected by a walk-through metal detector. Garrett hand-held detectors will detect ferrous, non-ferrous and stainless steel weapons, contraband, and other metallic objects.

Super Scanner® V Hand-Held Metal Detector

- Self-calibrating - Digital microprocessor technology eliminates the need for periodic sensitivity adjustments. Large 8" scan surface.
- Sharp audible alarm and bright red LED indicates the detection of metal.
- Rugged, high-impact case.

SuperWand® Hand-Held Metal Detector

- 360° detection field with pinpointing tip.
- Rugged, high-impact construction with structurally isolated coil for added impact absorption.
- Rebar Elimination Control.

THD™ Hand-Held Metal Detector

- Silent vibrating with Red LED alarm indicator.
- Powerful 4-inch length and 360° detection area.
- Ultra sensitive response to metal objects.

WE'VE GOT YOU COVERED

Garrett brings decades of experience, made in America quality, dependable service, and checkpoint-specific solutions to the world of security screening. We understand the many factors that make your context unique, and we are here to help.

Take charge of your security and uncover the unseen with Garrett.

Evidence Recovery Metal Detectors

Garrett has crime scene evidence recovery metal detectors and pinpointers to handle almost any challenge, including deep submergence.

CSI Pro™ All Terrain Metal Detector

FULLY WATERPROOF TO 10 FEET
(3 meters)

The powerful CSI Pro, with a 0 to 99 Digital Target ID scale, provides all terrain versatility and unmatched performance for metallic crime scene evidence recovery.

CSI 250™ Ground Search Metal Detector

The simple-to-operate CSI 250 has unparalleled performance for budget-minded departments.

- Easy operation, low cost
- ID Legend for CSI targets
- Includes MS-2 headphones and CSI carry bag!

Garrett's CSI detectors:
CSI Pro, CSI 250, and
Sea Hunter Mark II

CSI Pro-Pointer® II Pinpointing Metal Detector

Ideal for land-use evidence recovery. Audible/Vibrating alarms increase in intensity based on target's proximity (to quickly pinpoint crime scene evidence).

Both Pro-Pointers include: LED flashlight for low-light recoveries; exclusive scraping blade to sift through soil; pinpointing tip and 360° side-scanning capability; holster; and more!

Sea Hunter Mark II™ Metal Detector

Fully Waterproof to 200 feet (65 meters)
Find all types of metal objects-including lead, brass, and foil-in underwater surf, beach, swamp or freshwater environments. The Sea Hunter provides pulse induction performance to help ignore saltwater and mineralized soils. Choose from two Discrimination Modes.

CSI Pro-Pointer® AT Pinpointing Metal Detector

Fully waterproof to 20 feet (6m). Choice of three sensitivity levels. Fast retune (quick press) narrows detection field for precise pinpointing of larger objects. Choose from Stealth Mode operation (vibrate-only) or patented proportional audio/vibrate alarm.

Garrett Countermine / ERW Division

Metal Detectors

Garrett's RECON-PRO All Metals Locators are designed to operate under any field conditions. These tactical metal detectors are highly rugged, simple to operate, and are waterproof to 3 meters.

Deep detection capability for humanitarian ERW operations. Rapid tactical deployment for military searches for mines, UXO, and IED searches.

Highly Advanced Pulse Induction Technology with All-Terrain Versatility

- Offers performance, durability, and portability for use in all soil environments.
- Environmentally sealed. Fully waterproof to 3 meters.
- 5 search head options provide the flexibility to locate targets from small, low-metal content mines to large, deep UXO.
- Order your AML-1000 or AML-750 to fit your specific needs.
- AML-750 addresses large areas at moderate swing speeds. AML-1000 addresses smaller areas at more precise swing speeds.

MIL STD 810G certified to demonstrate robustness.

Comprehensive Training Available

Garrett's Virtual Academy is a free online training platform with video content and graded knowledge checks so users and supervisors can learn with confidence. The videos are divided into short segments to ensure trainees are not bogged down in too many details and that each course can be completed at the user's convenience.

Resources available for learning are:

- Walkthrough setup and accessory installation
- Checkpoint design and operation
- Usage guidelines for Garrett hand wands
- And more!

American-Made, World Class Quality

Charles and Eleanor Garrett founded their company in 1964 to build a better metal detector. Through the decades, they have proudly maintained their personal goal-keeping their products American-made with the highest quality of standards. All Garrett products are designed, assembled, tested for quality control and shipped from the company headquarters in Garland, Texas.
